### DIY Directions • Storage & Handling:

**SHAKE WELL!** *The mixed product should be agitated prior to and during application.*

**Warm Season Turf:** Apply at a rate of 15 ounces per 1,000 sq. ft. Mix with water at a minimum 7:1 dilution. Apply directly to foliage or to soil at seeding.

**Cool Season Turf:** Apply at a rate of 15 ounces per 1,000 sq. ft. Mix with water at a minimum 7:1 dilution. Apply directly to foliage or to soil at seeding.

For specific application instructions related to *seed-ing and over-seeding, spray equipment, applying with N-Ext™ specialty products, watering-in, etc.* please visit [greeneountyfert.com/diy/](http://greeneountyfert.com/diy/)

**Storage:** Store in a cool dry place away from direct sunlight. Product will store for 2 years under warehouse conditions.

Apply in accordance with best management practices (BMP's) established by your Cooperative Extension Service. Observe any State or Local fertilizer application regulations.

**Caution:** Apply only to turf and soil.

**Keep out of Reach of Children:** If product comes in contact with skin or eyes, flush with water immediately.

**PRODUCT DESCRIPTION:** 16-21-2 GreenePOP™ Starter Fertilizer is engineered to deliver all that grass seed needs to get growing quickly and start it's life on the right footing. The combination of nitrogen, phosphorus, and potassium Humic, Fulvic acid and sea kelp delivered with GreenePOP™ will feed the newly rooting turf as well as prepare the soil around the seed for quicker germination. GreenePOP™ can also be used for Phosphorus deficient soils or used in a balanced fertility program on all turf types. GreenePOP™ Starter Fertilizer can be applied directly on top of seeds at time of planting, applied pre-plant, or incorporated with a topdressing medium.

PACKAGING: 1.0-gal bottle and 2.5-gal bottle

Always read and follow label directions.
