PACKAGING: 1.0 gal bottle and 2.5 gal bottle

DIY Directions • Storage & Handling

SHAKE WELL! *The mixed product should be agitated prior to and during application.*

Warm Season Turf: Apply as an additive to regular fertilization program during summer months at a rate of 8 ounces per 1,000 sq. ft. for chlorotic or iron deficient plants. Mix with water at a minimum 7:1 dilution. Apply directly to foliage.

Cool Season Turf: Apply at a rate of 8 ounces per 1,000 sq. ft. for chlorotic or iron deficient plants. Mix with water at a minimum 7:1 dilution. Apply directly to foliage.

Storage: Store in a cool dry place away from direct sunlight. Product will store for 2 years under warehouse conditions.

Apply in accordance with best management practices (BMP's) established by your Cooperative Extension Service. Observe any State or Local fertilizer application regulations.

Caution: This product contains the secondary micronutrient iron. Iron may stain concrete, wood and other pervious and impervious surfaces. **Apply** only to turf, plants, and soil. If plants are flowering, apply to base of the plant to avoid staining of blooms.

Keep out of Reach of Children: If product comes in contact with skin or eyes, flush with water immediately.

PRODUCT DESCRIPTION

7-0-0 GreenNe Effect™ Turf & Ornamental Fertilizer Plus 6% Iron is a simple and economical way to correct chlorosis issues in turf and ornamentals. Our iron is chelated with citric acid to form an organic chelation bond. This bond allows for a consistent greening effect on chlorotic plants and provides a deep green color to turf.

APPLICATION RECOMMENDATIONS

- The low level application rate makes the **7-0-0** product ideal as an additive to summer time application of fertilizer, or as a stand-alone product for certain application(s) during the growing season.
- Rates will vary depending on type of application from 3 ounces per thousand to 12 ounces per 1,000 sq. ft.

Always read and follow label directions.
