

HERBICIDE

2,4-D Amine 4

2,4-D Amine 4 is a low-volatile phenoxy herbicide formulation that controls a variety of broadleaf weeds in crops including cereal grains, corn, rice, sorghum, soybeans (pre-plant burndown only), sugarcane, fallow land and ornamental turf. A superior formulation provides the user with flexibility in mixing with other herbicides for additional weed control options.

PRODUCT FEATURES:

- A solvent-free, highly soluble formulation that forms a homogeneous solution.
- Effective in controlling more than 90 broadleaf weeds when applied at the young and active growing stage.
- Broad label uses including ornamental grasses, grasses cut for hay, forestry and aquatic weed control.

APPLICATION RESTRICTIONS

- Do not apply this product through any type of irrigation system.
- Do not use in greenhouses.
- Applicators must follow all state and local pesticide drift requirements regarding application of 2,4-D herbicides.
- **2,4-D Amine 4 is NOT approved for application to the new Corn, Cotton and Soybean 2,4-D tolerant GMO crops.**

See label for complete application guidelines and restrictions.

ACTIVE INGREDIENT: 2,4-D AMINE

HERBICIDE GROUP: I O

ACTIVE INGREDIENT PER GALLON: 3.8 lbs.

MODE OF ACTION: Synthetic auxin growth regulator

USE RATES: See label for all product use rates

PACKAGING: 4x1's, 2x2.5's, 30's and 265 gal
