PRO DIRECTIONS

SHAKE WELL! *The mixed product should be agitated prior to and during application.*

Warm Season Turf: Apply as an additive to regular fertilization program during summer months at a rate of 8 ounces per 1,000 sq. ft. for chlorotic or iron deficient plants. Mix with water at a minimum 7:1 dilution. Apply directly to foliage.

Cool Season Turf: Apply at a rate of 8 ounces per 1,000 sq. ft. for chlorotic or iron deficient plants. Mix with water at a minimum 7:1 dilution. Apply directly to foliage.

Storage: Store in a cool dry place away from direct sunlight. Protect from freezing. Product will store for 2 years under warehouse conditions. Apply in accordance with best management practices (BMP's) established by your Cooperative Extension Service. Observe any State or Local fertilizer application regulations. **Caution:** This product contains the secondary micronutrient iron. Iron may stain concrete, wood and other pervious and impervious surfaces. Apply only to turf, plants, and soil. If plants are flowering, apply to base of the plant to avoid staining of blooms. Keep out of Reach of Children.

PACKAGING: 2.5 gal bottle, 5 gal bucket, 275 gal IBC tote

PRODUCT DESCRIPTION

7-0-0 GreeNe EfFect™ Turf & Ornamental Fertilizer Plus 6% Iron is a simple and economical way to correct chlorosis issues in turf and ornamentals. Our iron is chelated with citric acid to form an organic chelation bond. This bond allows for a consistent greening effect on chlorotic plants and provides a deep green color to turf.

APPLICATION RECOMMENDATIONS

- The low level application rate makes the **7-0-0** product ideal as an additive to summer time application of fertilizer, or as a stand-alone product for certain application(s) during the growing season.
- Rates will vary depending on type of application from 3 ounces per thousand to 12 ounces per 1,000 sq. ft.
