

T-NEX

Plant Growth Regulator

T-NEX is a micro-emulsion concentrate used to manage growth and improve quality and stress tolerance of warm- and cool-season turf grasses. Improves rich color, lateral stems and root mass development. Inhibits vertical shoot growth. Helps produce healthy, durable blades in turf grass.

Features & Benefits

- Reduces the growth of grasses, reducing your time with mowing
- Mixes with water completely, and it can be used with other pesticides and liquid fertilizers.
- Minimizes the need for edging of turfgrass along sidewalks, curbs, parking lots, driveways, flower beds, fences and around posts, storage sheds and trees.

Application Sites

Turf, Golf Courses

Effective Against

Bahiagrass, Fescue, Bentgrass, Kikuyugrass, Bermudagrass, Annual bluegrass (*Poa annua*), Bluegrass, Ryegrass, Buffalograss, St. Augustinegrass, Carpetgrass, Zoysiagrass

Active Ingredient

Trinexapac-ethyl 12%

Comparative Brand

Primo Maxx®

Packaging

4 x 1 Gallon/case (80 cs/pallet)
2 x 2.5 Gallon/case (36 cs/pallet)

Mode of Action

Slows production of gibberellic acid, a hormone that promotes cell elongation in plants.

Always read and follow product label directions.
