PRO DIRECTIONS

**Greens, Tees, Fairways, Lawns and Sports Turf
Localized Dry Spots and Water Repellency Conditions**

Apply as a preventative program in two applications:

Apply at 8 ounces per 1,000 sq. ft.

Wait 7 to 10 days to reapply second application..

Apply as a Two-Split Application:

Spray at 8 ounces per 1,000 sq. ft. and apply in 2 gallons of water per 1,000 sq. ft. spray solution.

Product is safe for use on all turf types.

PRODUCT DESCRIPTION

Hydr8 EXT™ 100% Alkoxylated Polyols. This is the solution for a 120-day protection. For those of you looking to enhance a "drought protection" program and look at a one shot starting before the onset of drought or dry conditions, this is the ticket.

A single application of a full rate will require a relatively high volume of water carrier (5 gallons of water per 1,000 sq. ft.) Application of Hydr8 EXT™ can also be split into 2-3 applications starting earlier in the season leading into the early summer.

Applications can be made via commercial tank sprayers, ride-on spreader/sprayers hose end and pump sprayers, and most irrigation systems.
