

Concentrate

N-Ext Hydr8 EXT™

Soil Surfactant / Wetting Agent

CONTAINS BENEFICIAL SUBSTANCES

100% Alkoxylated Polyols

Information regarding the contents and levels of metals in this product is available on the internet at <http://aapfco.org/metals.html>

Purpose Statement:

May increase nutrient uptake.

Hydr8 EXT™ is a Soil Applied Block Polymer Surfactant which:

- Hydr8 EXT will last up to 45 days in the soil to help manage water repellency conditions, increase infiltration rates and create uniform penetration of water in the soil profile.
- Hydr8 EXT will help prevent localized dry spot conditions from forming if used early in the season or before water repellency conditions appear.
- Hydr8 EXT will not burn.

Storage and Disposal: Store in a safe manner. Store in original labeled container only in a cool place away from direct sunlight. Protect from freezing. Keep tightly sealed when not in use. Keep in a secure and locked storage area. Do not add water to the contents of this container. Triple rinse container, empty rinse water into spray or stock tank. Store product and dispose of unused product and empty containers in accordance with federal, state and local regulations. **Apply** in accordance with best management practices (BMP's) established by your Cooperative Extension Service. Follow state application rates for your turf type unless otherwise directed. Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. **Caution:** Apply only to turf and plants. **Keep out of reach of children.** If product comes in contact with skin or eyes flush with water immediately. For additional safety information please see the SDS.

Pro Directions For Use

Lawns and Sports Turf, Localized Dry Spots and Water Repellency Conditions

Apply as a preventative program:

Apply at 4 to 6 ounces per 1,000 sq. ft. every 6 to 8 weeks.
Apply at least two times.

If drought conditions are present:

Apply at 6 to 8 ounces per 1,000 sq. ft. every 6 to 8 weeks.
Apply at least two times.

For a spot treatment strategy:

Apply at 2 to 4 ounces per 200 sq. ft. every 4-6 weeks to treat for existing localized dry spots. Apply at least two times.

Product is safe for use on all turf types.
